

Company, Product & Service

Horsent Technology CO.,LTD
2025

Company: Mission and Vision

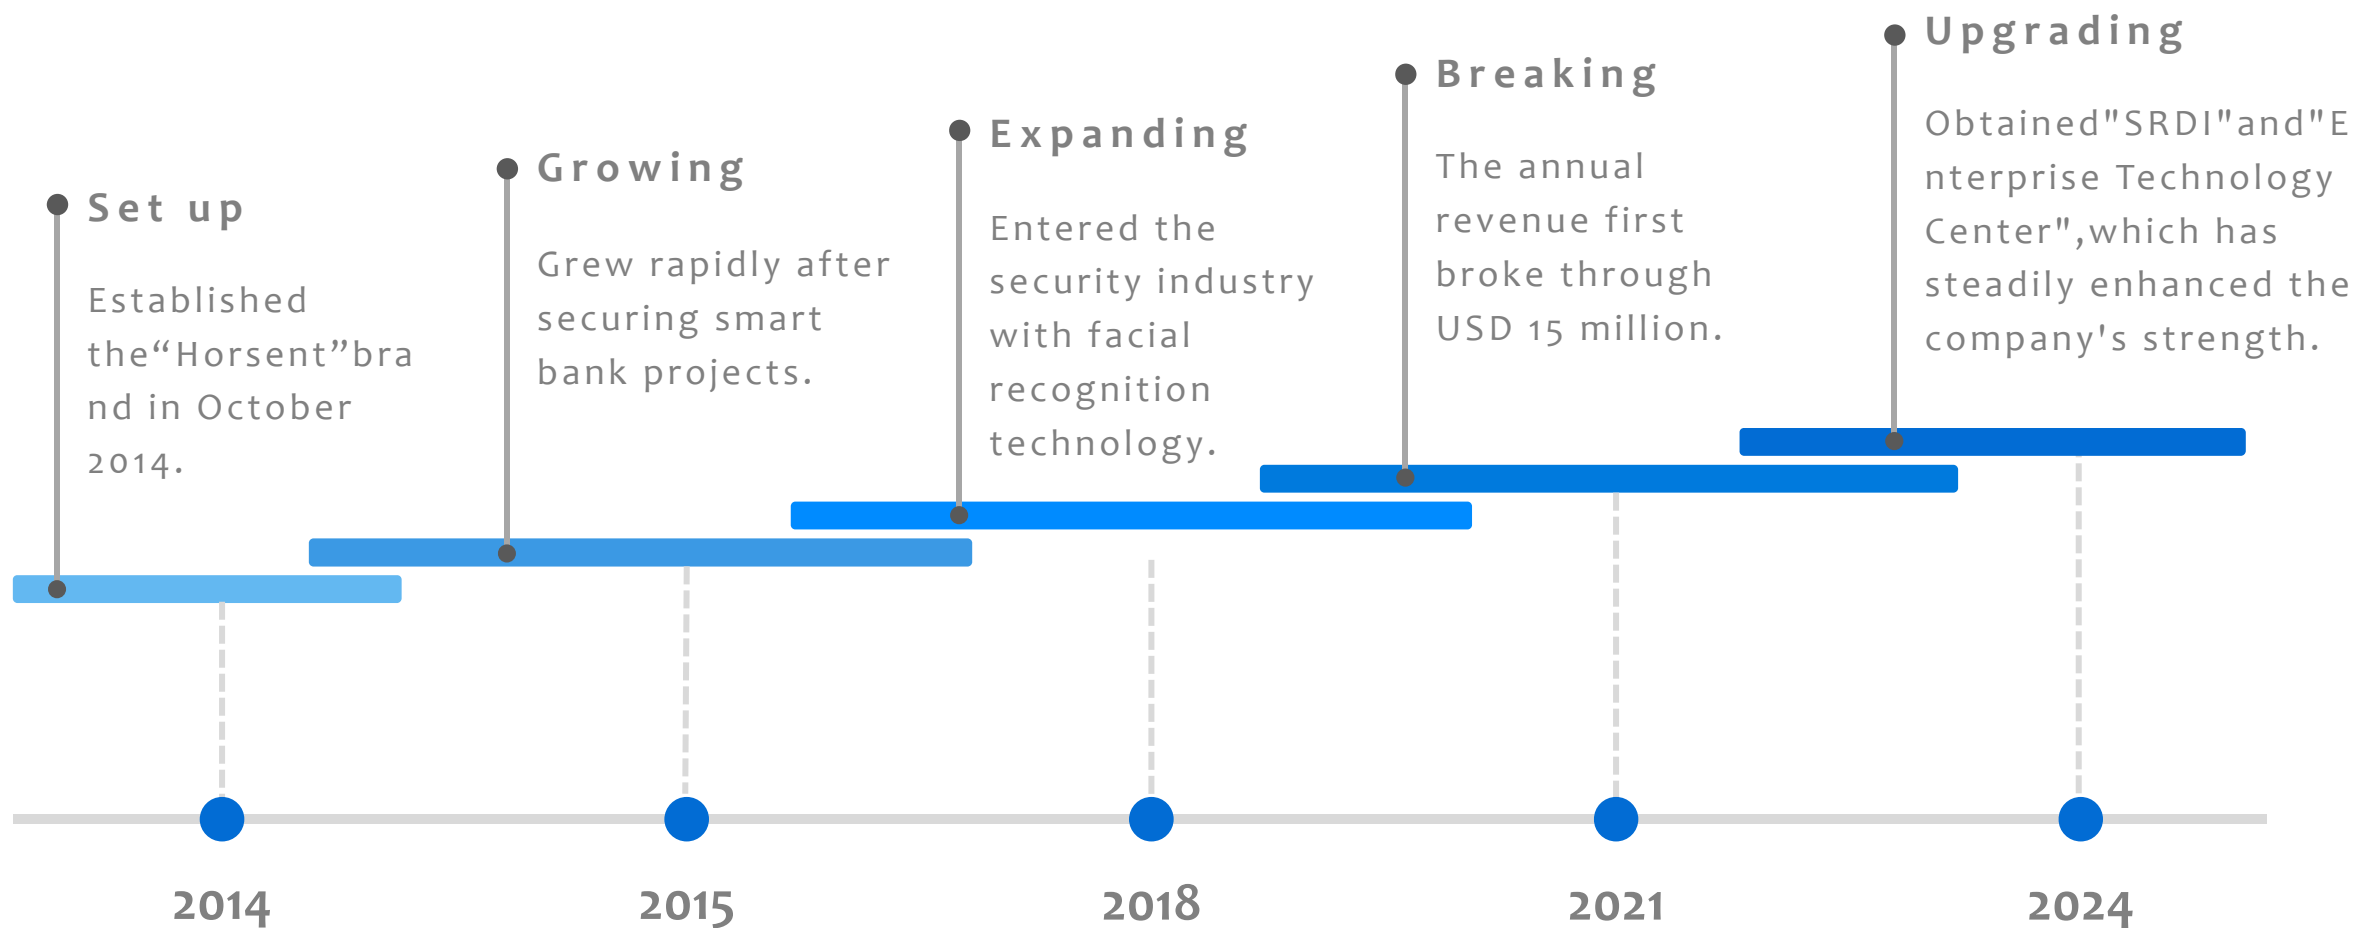

Focus on the fields of touch displays and smart terminals, satisfying customer demands through continuous innovation.

Create greater value for our customers by providing high-quality, cost-effective products and services, aiming to become their reliable global partner.

Company: Milestone

——Taking users' demands as the orientation to promote the company's steady growth.

Company: 6 Numbers

——Learn more about us through 6 numbers

*Sister company named Horsent Wiselink CO.,LTD.

Company: Major Business

——Focus on 3 business units, keeping innovation to ensure sustainable growth.

OBM

Design, mfg. and sales Horsent brand touch display, smart interactive terminals.

ODM/OEM

Provide ODM/OEM services for smart hardware to brand owners, agents, etc.

Sourcing Agency

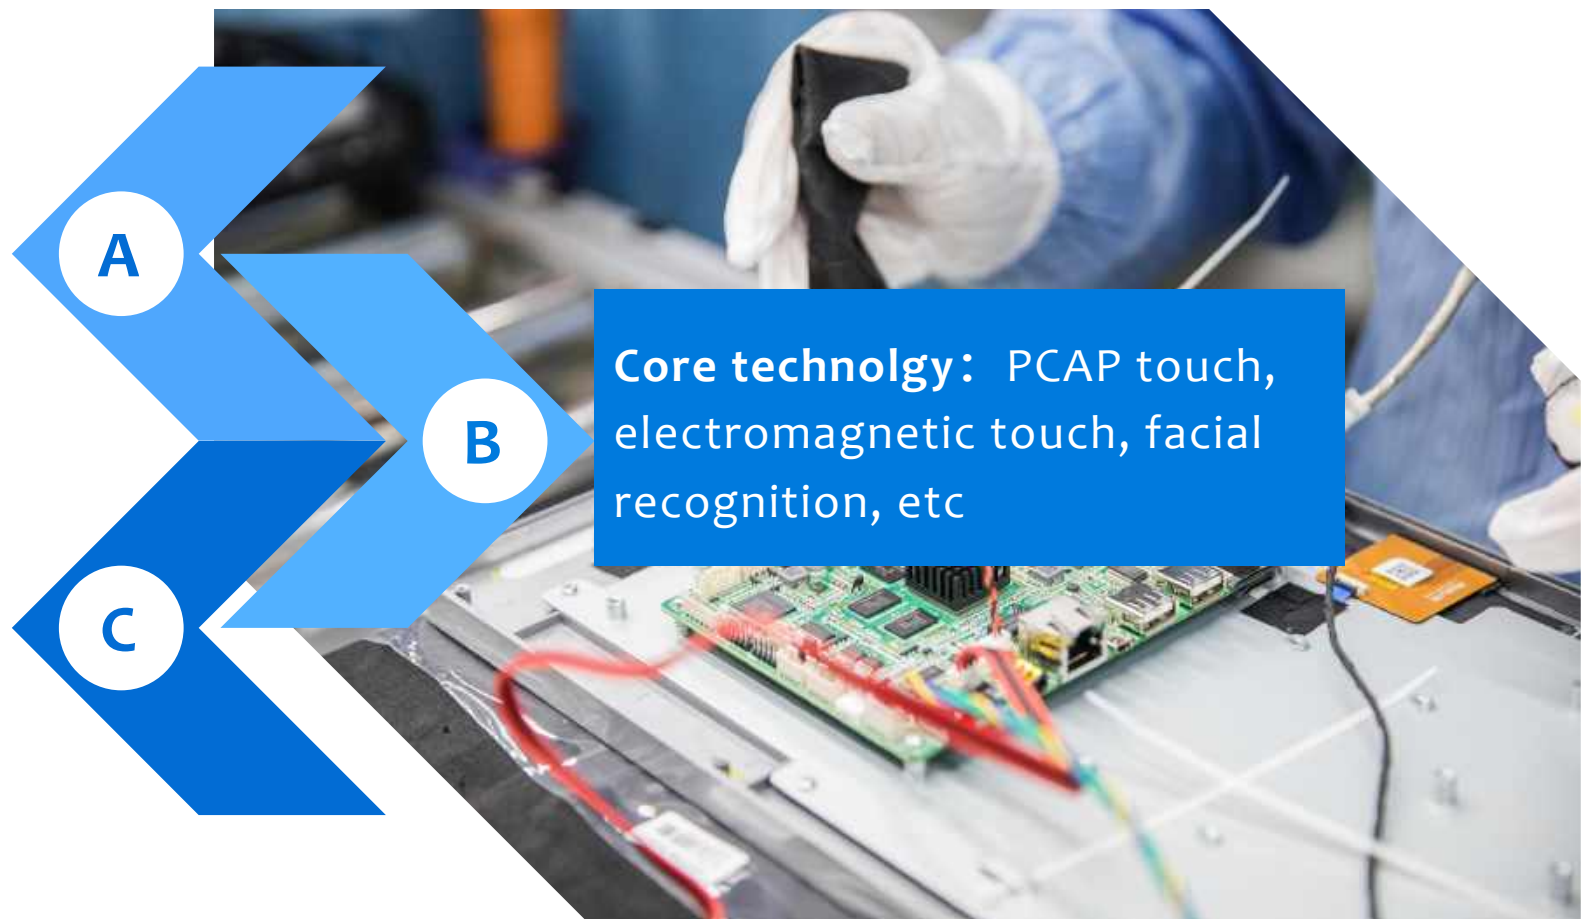

Source peripheral components from China for oversea customers.

Company: Core Competence

——Taking the talent team as the core to build strong competitiveness.

R&D Team: Over 20 R&D engineers with an average industry experience of more than 15 years.

Key Capability: Customized service from PCBA to entire terminal kiosk, covering function to appearance structure.

Company: Qualifications

- National High-tech Enterprise
- "SRDI" Enterprise
- Enterprise Technology Center
- ISO9001 certification
- ISO14000 certification
- ISO45001 certification
- CCC/CE/FCC certification
- Energy-saving certification
- 50+ patents

Company: Facilities & Supply Chain

——Industry-leading facilities and efficient supply chain resources ensure fast and reliable delivery of every order.

Industry-leading facilities and an efficient supply chain ensure the fast and reliable delivery of every order. Our modern 3,500+ sqm factory includes a clean room, assembly lines, an aging room, a testing lab, and a warehouse, among other facilities.

The industrial park, which is home to concentrated industries such as PCB assembly, sheet metal processing, and surface treatment, provides our company with comprehensive industrial support.

Company: Partners Reference

——"Horsent" has become a trusted brand for hundreds of industry users worldwide.

Company: Applications Reference

——Whether in government halls,banks,hospitals,or at stations,'Horsent'can provide you with stable and convenient service.

Our products and solutions are widely applied in government affairs, banks, schools, airports, subways, hospitals, retail, smart manufacturing, commercial buildings,and entertainment venues, etc.

Product: Outdoor Touch Display

——Ultra-high brightness

- Up to 3000nits brightness
- Optical bonding
- Built-in powerful cooling system
- Anti-vandal, water-proof
- Anti-glare, -UV and -IR coating
- 15.6" , 21.5" and 32" available now
- Other size can be customized.

Product: Industrial Touch PC/Display ^{New}

——It is designed for harsh environments such as industry, vehicles, and ships.

- All-aluminum alloy casing with stronger and better heat dissipation
- Built-in high-performance X86 motherboard
- Abundant I/O interface
- Excellent dustproof and waterproof performance
- Available in 10.1" to 21.5" models*
- Suitable for industrial equipment, automatic production line, etc

*Please contact our sales representative for more models

Product: AI Terminal

New

——Deliver an immersive interactive experience based on AI technology

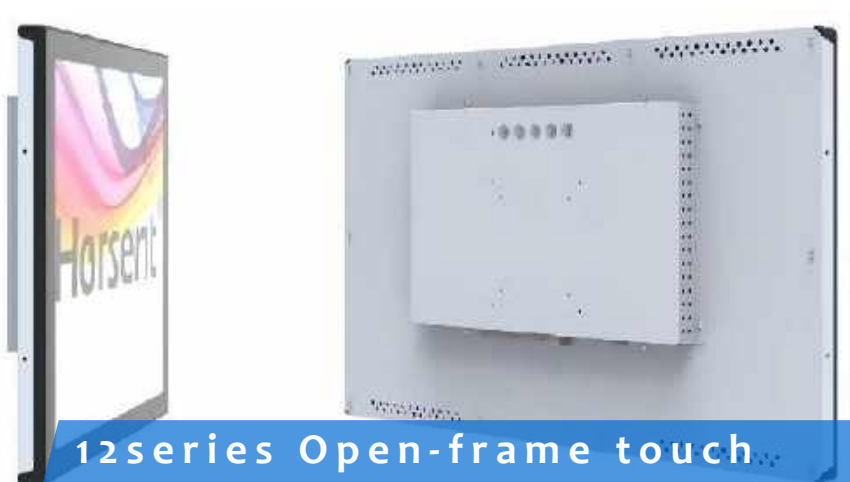

- 65", 75" and 86"
- Transparent Display
- Realistic autostereoscopic 3D effects
- iR touch optional
- Support voice interaction
- Large-scale AI model optional

Product: Classic Series Touch Monitors

——Sold popularly over 10 years and became the standard product format in the interactive display field.

12series Open-frame touch monitor

- Seamlessly integrated into cabinet
- Multipoint capacitive touch
- Various customization options
- Support applications from 10" to 43"

14series Wall-mount touch monitor

- Aluminum frame
- Multipoint capacitive touch
- Various customization options
- Support applications from 13.3" to 43"

Product: 16 Series Slim Touch Monitor

——Ultra-light & ultra-thin, the thinnest part of the edge is only 8mm.

- Minimize machine weight and installation space requirements
- Support applications from 10.1" to 43"

The 16 series can support high customization, allowing it to be derived into a variety of intelligent terminal products with rich functions and thin structures to meet the application requirements of different scenarios.

Product: Type-C Touch Monitor

——One cable wire the screen, implement touch interaction

Newly 15.6" Type-C touch monitor
Just one wire to interact, brings new
experience for office and entertainment.

- Ultra-light & ultra-thin design, thinnest point thickness is only 8mm, weighs 1650g, rugged and portable.
- 15.6" HD LCD screen, full lamination screen optional, brings better image quality display and interactive experience.
- Supports desktop or cantilever installation to meet different application scenarios.

*Please contact our sales representative for more sizes.

Product: Touch AiO Series

——Higher integration helps customers achieve productization and application deployment faster.

Customization based on open-frame and wall-mount touch monitor series :

- Support ARM and X86 platform
- Support board-level customization
- Support special I/O
- Support special size and structure
- Support application scenarios from 8" to 43"

Product: Smart Terminal Kiosk

——From PCBA to the total machine,function to format,we provide one-stop design and manufacturing services.

We have abundant
successful cases in smart
government affairs,
hospitals, transportation,
retail, hotels, banks and
libraries, etc.

Product: Multifunctional interactive terminal

——We promote the digital and paperless transformation of service windows.

- PCAP touch and Electromagnetic Resonance (EMR) writing
- Support fingerprint, face recognition, second generation card recognition
- Support certificates, documents, physical multi-media scanning
- Support embedded encryption to encrypt handwriting data
- Support localized platform
- Available from 5" to 21.5"

Product: Facial Recognition Terminal

——Applicable to security, access control, attendance, retail, and other application scenarios.

- 2 Technologies: 3D, binocular face recognition
- 3 installation ways: wall-mount, floor mounted type and stand mounted
- Support stand-alone mode and network mode
- Size from 8" to 21.5" available

Product: Special Touch Monitor

——We provide innovative products for more emerging applications and creative scenarios.

Curved touch monitor

- 32"and 43"
- PCAP touch technology
- Support built-in X86/ARM board
- LED strip lighter

LED-frame Touch Monitor

- Size from 18.5"to 43"avaiable
- PCAP touch optional
- Colorful LED Frame
- Well Sealed

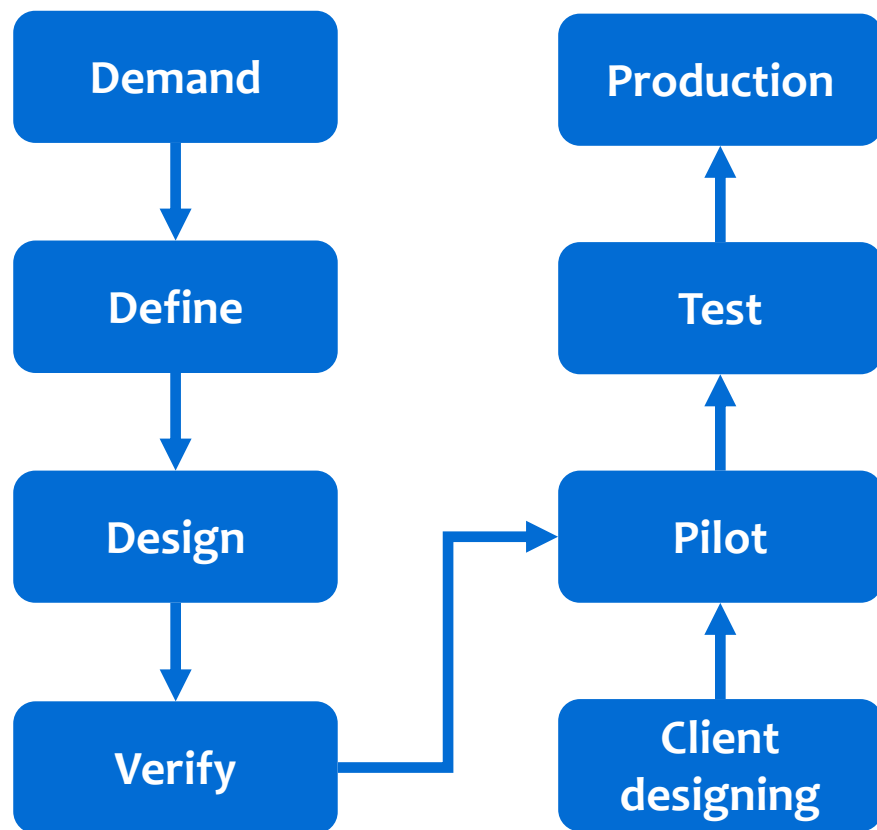

Advertising monitor

- Large size outdoor LCD advertising machine
- LED display screen
- LCD splicing screen

*Please contact our sales representative for more innovative products.

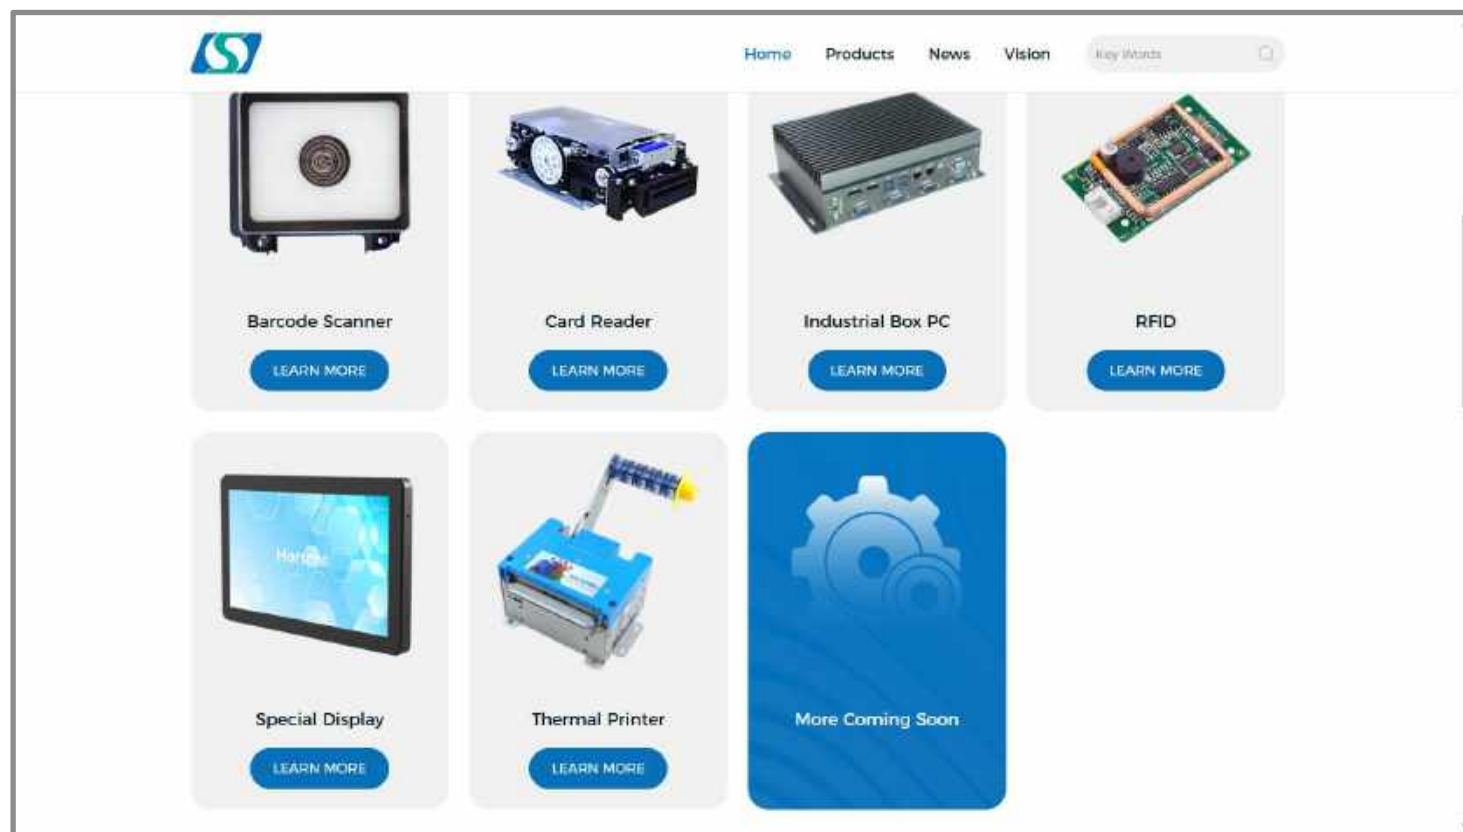

Service: Customized Service——ODM/OEM

——Focusing on the smart hardware field, we offer custom design services and full-process product manufacturing services from prototype, pilot test to mass production.

Service: One-stop Supply Chain

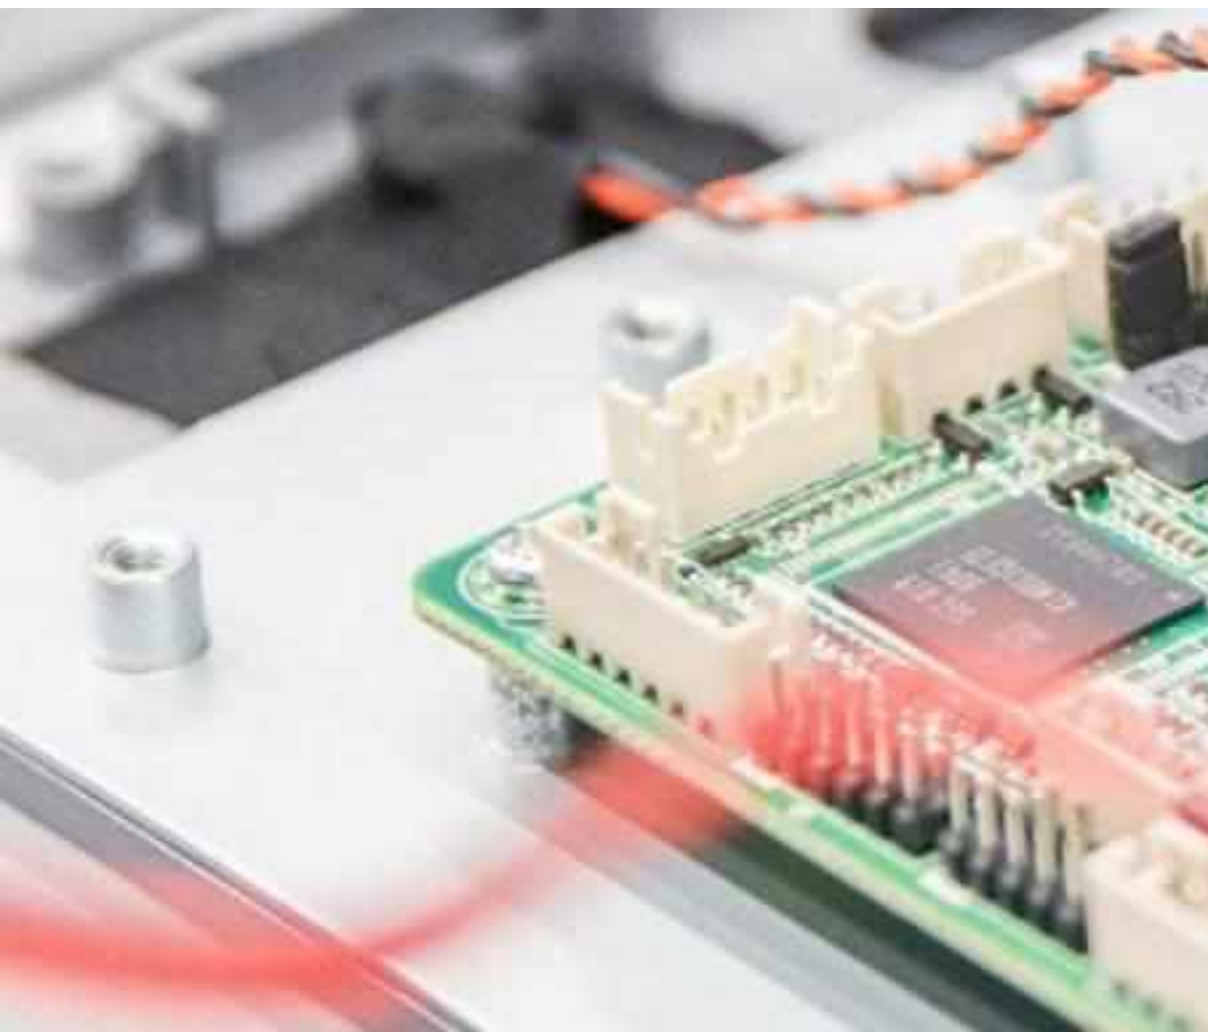

——Sourcing critical parts of smart terminals with high quality and cost-effectiveness for oversea partners.

Please visit:
<https://osc.horsent.com>
to get more details.

Service: Quality, Support and After-sales

——Adhere to super quality and best service.

In strict accordance with the requirements of the ISO9001 quality management system, we ensure that the product factory pass rate is 100%.

Our experienced technical support team maintains timely and efficient communication with customers.

The after-sales service team provides 7*24h online and offline service."
